

VIREN PATIL

Software Engineer

+918208689637 • virenpatil1@outlook.com • https://virenpatil.netlify.app/ • Pune

Summary

As a Computer Science graduate with a strong foundation in modern JavaScript systems and libraries, I'm well-prepared to tackle new challenges. With a proven track record of quick learning and a passion for acquiring new skills, I've spent the past years as a Software Engineer. During this time, I've focused on developing applications using technologies like React, Redux, and Express.js. This hands-on experience has deepened my understanding of tech stacks and enhanced my proficiency in programming. Ready to relocate.

Viceversa Srl

Milan, Italy

Software Engineer

12/2021 - Present

Company Description

- Developed software solutions utilizing Node.js, Vue.js, and React.js frameworks to deliver high-quality products for both customer-facing and back-office applications
- Leveraged Google Cloud Functions to implement serverless functions for scalable and cost-effective microservices architecture
- Worked with microservices architecture and containerization using Docker and Kubernetes, ensuring efficient deployment and management of applications
- Utilized Google BigQuery for analyzing large datasets, enabling data-driven decision-making and optimizing system performance
- Designed and implemented database solutions using PostgreSQL, ensuring data integrity and efficient storage and retrieval
- Contributed to the implementation and integration of Open Banking APIs like Tink, enabling secure and seamless financial data exchange
- Integrated electronic signature functionality using DocuSign API, streamlining the contract signing process for customers
- Implemented data storage and retrieval mechanisms using Google Cloud Storage, ensuring reliable and secure storage of customer data
- Collaborated with cross-functional teams, including product managers, designers, and QA engineers, to deliver software solutions that met customer requirements and exceeded expectations
- Actively participated in code reviews, providing constructive feedback and ensuring code quality, adherence to coding standards, and best practices
- Engaged in continuous learning and professional development, keeping up with the latest technologies and industry trends in software engineering and cloud computing

MIKROBIT Sp. z o.o

Lublin, Poland

Frontend Developer Intern

02/2020 - 04/2020

Company Description

- As the intern in my task was to refurbish the existing government websites
- The tasks were to make some changes in the Joomla CMS and to add new features as per the guidelines of the E.U
- To create new features for the websites like making them responsive and to make the automatic email system by using Php
- To help the senior developer by doing small tasks like to check the alignments on the website and to check whether the websites are created by following the rules and the guidelines provided by the E.U
